

Automation Capabilities

NOVEMBER 2025

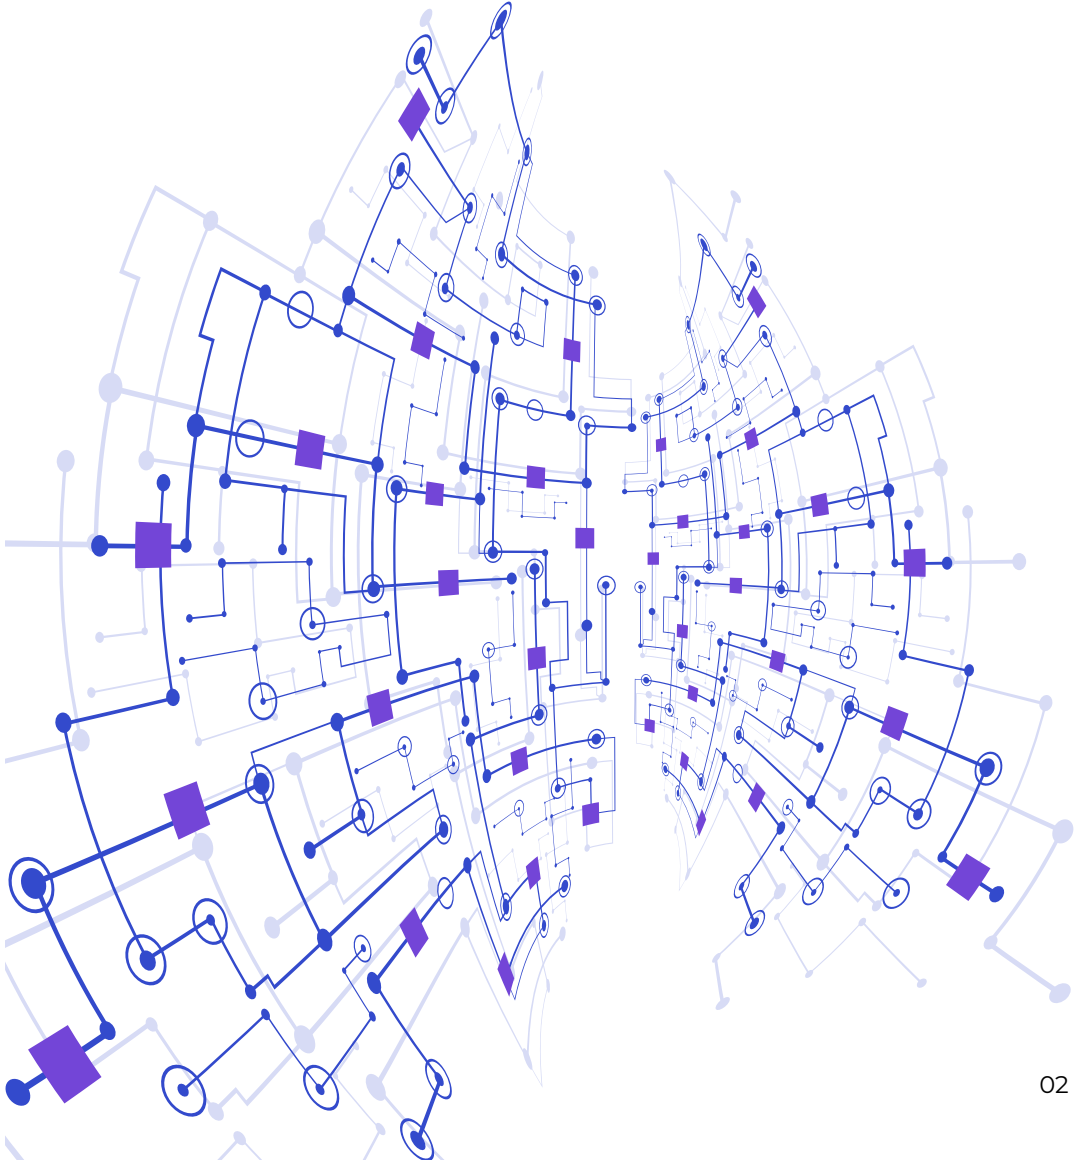

Introduction

Welcome to the

World of Operational Intelligence

Transform your operations with ADIS — Cogneesol's proprietary BPM 4.0 framework designed to move beyond traditional process management. ADIS empowers organizations with adaptive, intelligent, and scalable solutions that elevate performance, enhance decision-making, and create future-ready operational excellence.

Built for modern enterprises, ADIS integrates automation, analytics, and dynamic workflows to deliver continuous optimization across every touchpoint. It enables businesses to anticipate challenges, respond faster, and operate with greater precision — all while reducing inefficiencies and unlocking new levels of agility. With ADIS, your operations don't just function; they evolve, innovate, and lead.

AI-Driven Legal Operations Automation Platform

Background

Comprehensive automation platform for legal operations—combining AI intelligence and human governance to enhance efficiency, accuracy, and compliance in case processing

Context/Ask

- Automating repetitive document analysis tasks
- Routing work intelligently between AI and human agents
- Maintaining comprehensive audit trails
- Ensuring quality through multi-tier review processes
- Providing real-time visibility into operation

Scope

- Onboard Projects and Cases with defined workflow.

Workflow initiation,
- deployment and real time visibility to Operation's agents using OCR and LLM.
- **Integration and Dashboard:** Seamless API integration with multiple systems and an intuitive dashboard for efficient tasks processing

Approach devised and deployed:
