

Automation Capabilities

NOVEMBER 2025

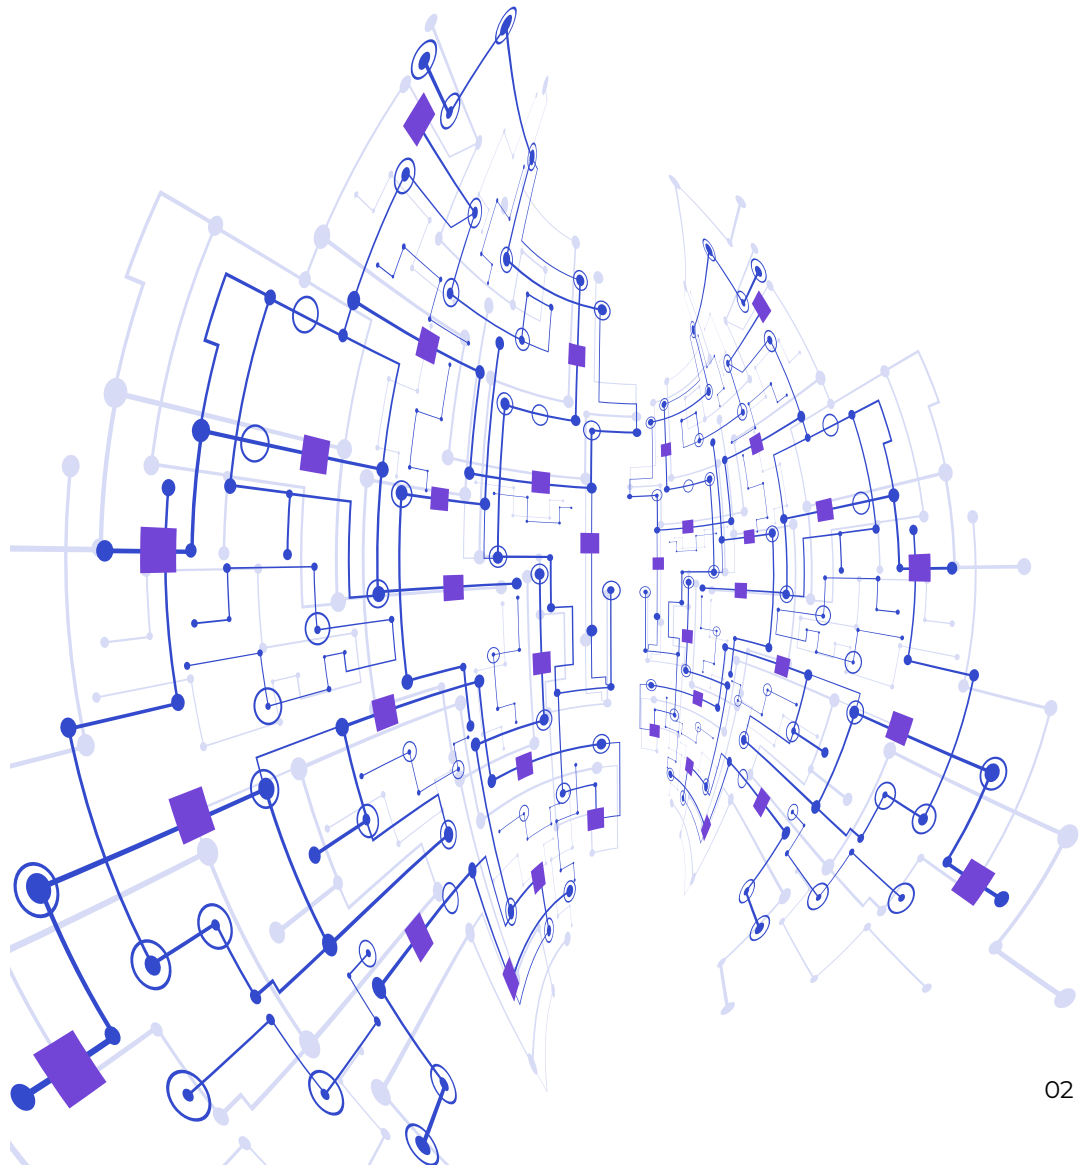

Introduction

Welcome to the

World of Operational Intelligence

Transform your operations with ADIS — Cogneesol's proprietary BPM 4.0 framework designed to move beyond traditional process management. ADIS empowers organizations with adaptive, intelligent, and scalable solutions that elevate performance, enhance decision-making, and create future-ready operational excellence.

Built for modern enterprises, ADIS integrates automation, analytics, and dynamic workflows to deliver continuous optimization across every touchpoint. It enables businesses to anticipate challenges, respond faster, and operate with greater precision — all while reducing inefficiencies and unlocking new levels of agility. With ADIS, your operations don't just function; they evolve, innovate, and lead.

Automating Journal Entry Systemrtration

Background

Journal entries record financial transactions within accounting systems.

The manual process required navigating Applied Epic, entering data from Excel, and notifying clients via email.

The aim was to reduce manual effort and improve transaction accuracy and
