

# Automation Capabilities

NOVEMBER 2025

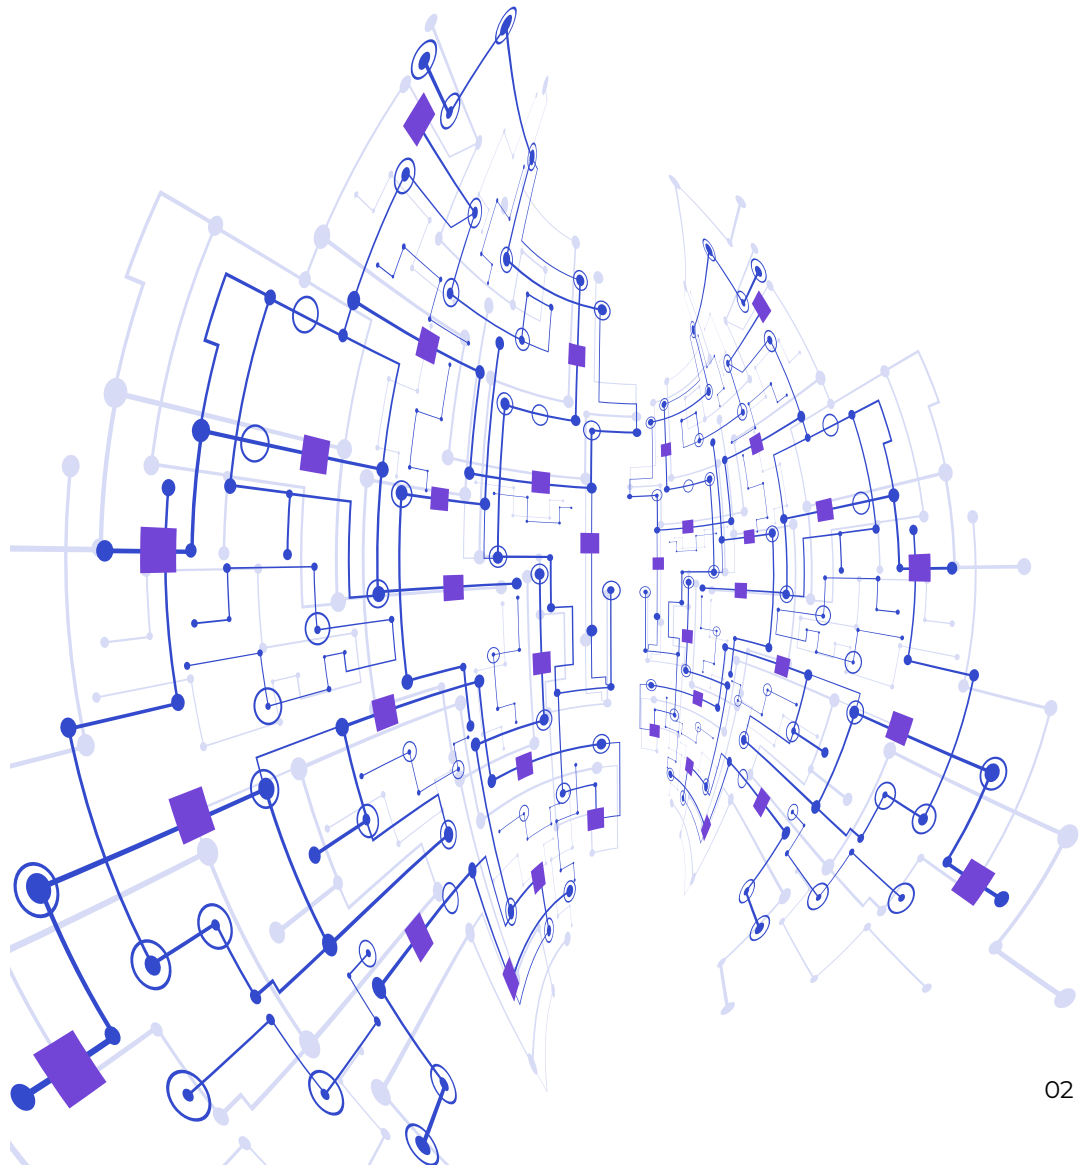

# Introduction

Welcome to the

## World of Operational Intelligence

Transform your operations with ADIS — Cogneesol's proprietary BPM 4.0 framework designed to move beyond traditional process management. ADIS empowers organizations with adaptive, intelligent, and scalable solutions that elevate performance, enhance decision-making, and create future-ready operational excellence.

Built for modern enterprises, ADIS integrates automation, analytics, and dynamic workflows to deliver continuous optimization across every touchpoint. It enables businesses to anticipate challenges, respond faster, and operate with greater precision — all while reducing inefficiencies and unlocking new levels of agility. With ADIS, your operations don't just function; they evolve, innovate, and lead.

# Automating New Submission Intake Process for Insurance

## Background

The new submission process in transportation insurance involves capturing all relevant details about the insured, vehicle, and required coverage.

Traditionally, this process is manual — from email verification, data entry, to acknowledgment dispatch — leading to delays and data inconsistencies.

## Context/Ask

The requirement was to automate the New Submission process in the AIM system to minimize manual effort in checking, entering, and uploading submission details, ensuring data accuracy and faster acknowledgment to agents.

## Scope

Automating the end-to-end new submission intake process, including data extraction, validation, AIM entry, and document upload to ImageRight.

# Single-step automation workflow integrated with AIM and ImageRight systems.

Single-step automation workflow integrated with AIM and ImageRight systems.
