

Automation Capabilities

NOVEMBER 2025

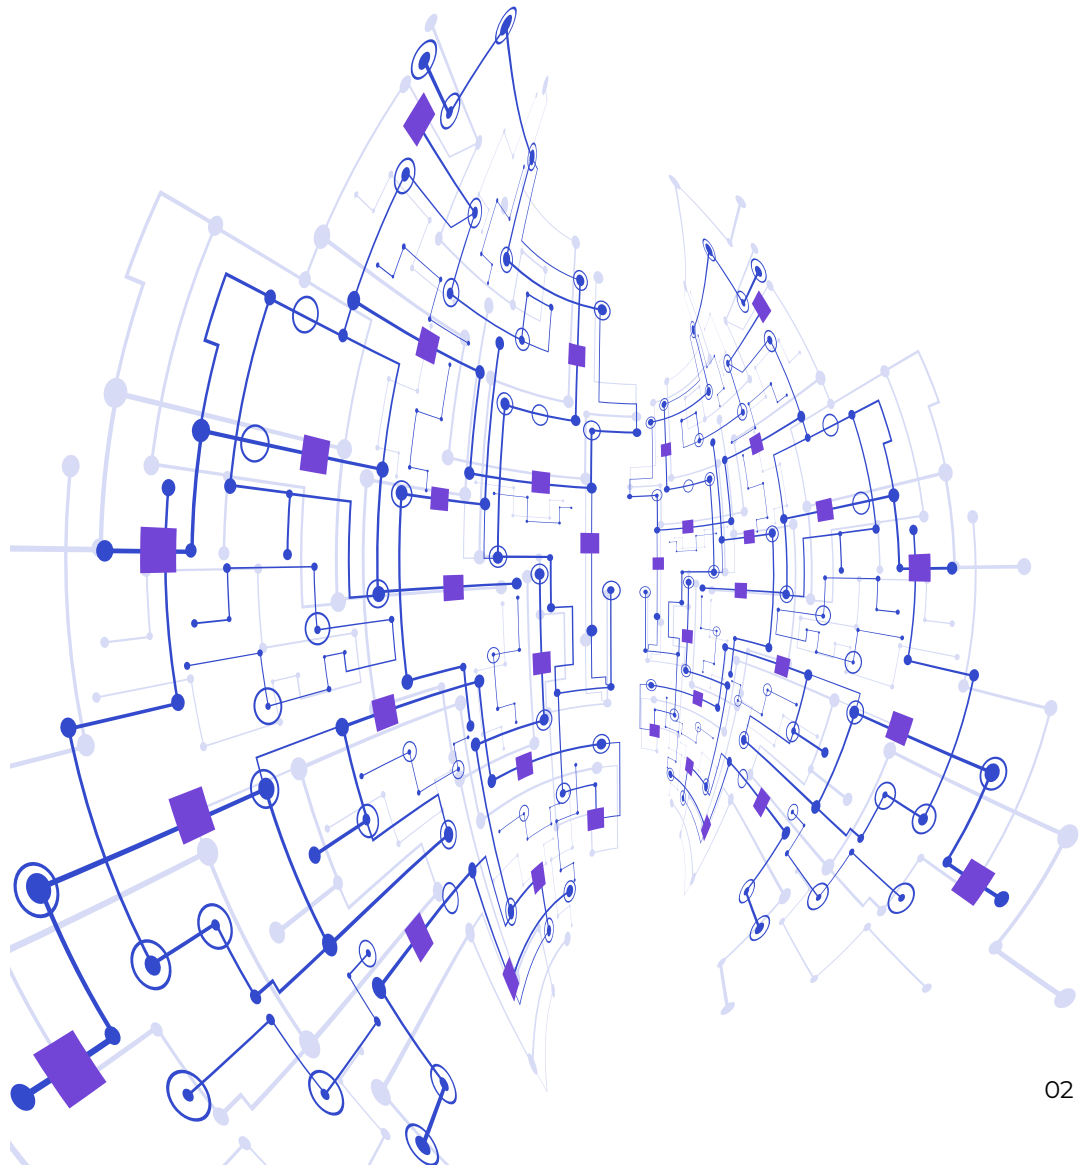

Introduction

Welcome to the

World of Operational Intelligence

Transform your operations with ADIS — Cogneesol's proprietary BPM 4.0 framework designed to move beyond traditional process management. ADIS empowers organizations with adaptive, intelligent, and scalable solutions that elevate performance, enhance decision-making, and create future-ready operational excellence.

Built for modern enterprises, ADIS integrates automation, analytics, and dynamic workflows to deliver continuous optimization across every touchpoint. It enables businesses to anticipate challenges, respond faster, and operate with greater precision — all while reducing inefficiencies and unlocking new levels of agility. With ADIS, your operations don't just function; they evolve, innovate, and lead.

Automating Voucher Entry System

Background

Voucher entry involves recording and authorizing financial transactions within accounting systems.

The process was highly manual, relying on data entry from Excel sheets into the Applied Epic platform followed by client email notifications.

Context/Ask

To automate the voucher entry process—reducing manual data handling, minimizing errors, and ensuring faster client communication.

Scope

- Automate journal entry reading, posting, and reporting.
- Integrate with Excel, Applied Epic, and Outlook for seamless workflow.

Approach devised and deployed: Single Layer Automation Framework

Single-step workflow automation was designed using Power Automate to handle the entire process

Power Automate: Voucher Processing Automation
