

Automation Capabilities

NOVEMBER 2025

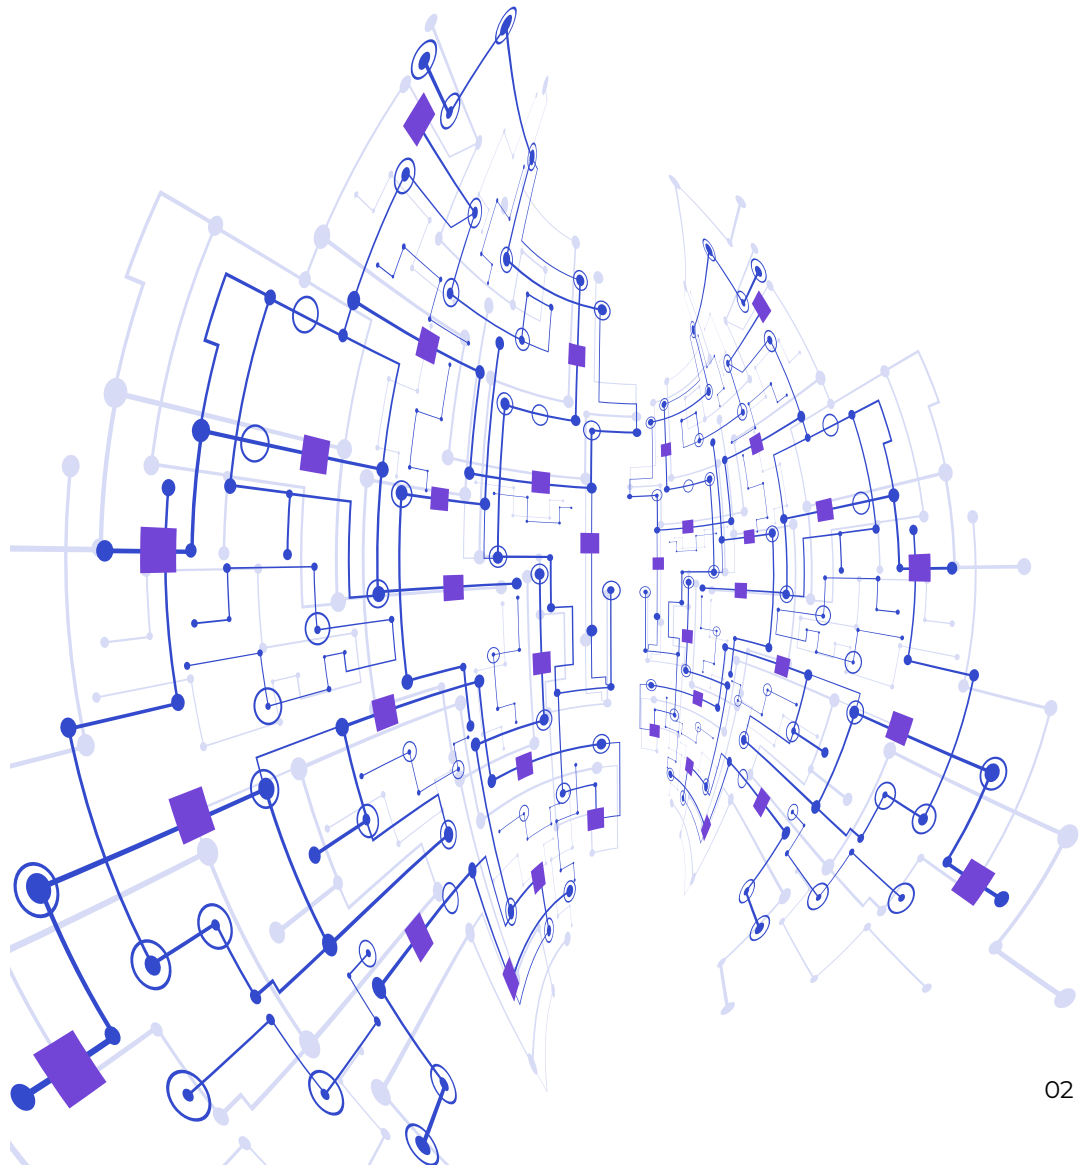

Introduction

Welcome to the

World of Operational Intelligence

Transform your operations with ADIS — Cogneesol's proprietary BPM 4.0 framework designed to move beyond traditional process management. ADIS empowers organizations with adaptive, intelligent, and scalable solutions that elevate performance, enhance decision-making, and create future-ready operational excellence.

Built for modern enterprises, ADIS integrates automation, analytics, and dynamic workflows to deliver continuous optimization across every touchpoint. It enables businesses to anticipate challenges, respond faster, and operate with greater precision — all while reducing inefficiencies and unlocking new levels of agility. With ADIS, your operations don't just function; they evolve, innovate, and lead.

Document Intake/Submission Platform powered by AI

Background

A US-based MGA, struggled with manual data extraction, processing, and integration across multiple systems, leading to inefficiencies, errors, and decreased productivity

Context/Ask

- Automate data extraction from emails and attachments
- Integrate with multiple systems for seamless data flow
- Provide an intuitive dashboard for efficient ticket processing

Scope

- **Email Connector:** Extracts key information from emails and attachments.
- **Data Extraction:** Uses OCR and LLM to extract data from unstructured documents.
- **Integration and Dashboard:** Seamless API integration with multiple systems and an intuitive dashboard for efficient ticket processing

Approach devised and deployed:
